Product lineup to be selected according to grilling method and intended purposes.

The product lineup to be selected according to grilling method and intended purposes.

Top Heat Griller < Carbon lamp heater> a

Joint development with Tokyo Electric Power Company, Incorporated

Wavy reflective plate grills quickly with low cost.

Maruzen's unique wavy reflective plate reflecting infrared rays and heat from the top grills cooking ingredient from the bottom. It speeds up cooking time and reduces energy cost.

Top heat system preventing fat drop onto heater part reduces smoke.

Top heat system having heating part on the upper side reduces smoke caused by fat drop, which keeps kitchen clean. Moreover its structure preventing oily smoke from coming to the front reduces fumes when used.

Comfortable and safe low radiating heat system.

Low radiating heat system moderates surface temperature of griller. It reduces worker's risk of burn injury during cooking and improves kitchen environment.

Height-adjustable according to cooking ingredient.

You can easily and accurately adjust the heat through changing the height of grill net and grate by handle lever according to ingredient's size, amount, and shape.

Easy handling of ON/OFF selection for each heater.

Selection switch makes ON/OFF easy for each of front, middle, and back heater. Turning only the heater to use ON and the other heaters OFF according to ingredient's size and amount contributes energy saving and cost reduction.

Small, lightweight, and space-saving design.

Small and lightweight griller without large and heavy transformer. You can make use of limited kitchen space.

Mount high efficient carbon lamp heater.

Tremendous taste and low cost by a generous amount of far-infrared ray.

"Carbon lamp heater" which is similar to charcoal is ideal heat source.

Carbon lamp heater is heat generator of carbon-based material. It emits a lot of far-infrared rays whose heat is highly absorbed in cooking ingredients compared to conventional electro thermal heater. It offers the best grill to maximize the taste of food ingredients, crispy golden brown outside and juicy inside.

Clean & cool, comfortable kitchen environment.

You can keep kitchen environment clean without exhaust gas. Low radiating heat system prevents temperature increase in kitchen, which leads to reduce air-conditioning cost and realizes comfortable working environment.

• Huge cut in running cost!

Conventional griller causes the waste of running cost, because it needs to be heated all the time during working hours. Conventional griller needs some time for heat generator to be ready to grill. However, high efficient carbon lamp heater inside Maruzen's electric top heat griller needs only 10 seconds to be ready! You can get rid of waste by operating only necessary heater according to ingredient's size and amount when you receive order. A lot of infrared rays reduce heat loss and shorten cooking time even at low-power, which cut running cost considerably.

■Running cost table (Compared with our existing products)

- I tullilli	is cost table	(Compared wit	ii dui existilig pidi	uucis)				
		Gas			Electric		Annual	A
	Model	Gas consumption	Annual cost reduction	Model	Power consumption	Annual running cost	Annual reduction	Annual cost reduction rate
Тор	MEK-064U Equivalent models	4.88KW	¥172,000	MEK-064U	4.2kW	¥141,000	¥31,000	18%
Heat				MEK-074U	6kW	¥201,000	_	_

*The running cost is calculated based on 8 hours of operation per day. *Contract fee and electric kitchen discount are not included in the price above.

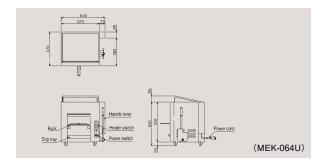

Maruzen, as a general commercial kitchen appliances & equipment producer, has provided products to reduce cost such as gas/electricity/water, and improve kitchen environment reducing burden on worker as well as offering quality function, operability, and enhancing safety of equipment. It means that our products can contribute to the society in terms of energy-saving, resource protection, reduction of CO₂ emission, and less impact on environment. Maruzen will keep developing products of low impact on environment.

Bottom Heat Griller < Carbon lamp heater>

Joint development with Tokyo Electri Power Company, Incorporated

Special stainless-steel pipe to enhance far-infrared ray effect. It brings out deliciousness of ingredient fully. PATENTED

Special stainless-steel pipe adopted in our griller emits a lot of far-infrared rays whose heat is highly absorbed in cooking ingredient when red heated by internal heater. It maximizes the taste of cooking ingredient, crispy golden brown outside and juicy inside.

Keep kitchen clean. Stainless- steel pipe creates less smoke.

Fat drop from cooking ingredient is shed by red heated special stainless-steel pipe but caught in drip tray. It prevents being stained and smoke, so you can cook smoothly and keep kitchen clean.

Height-adjustable according to delicate adjustment of the heat. (Dual purpose type) (General purpose type)

Two heights of skewer receiver are available for "dual

purpose type" according to cooking ingredient's size, amount, and shape. Hoisting grill net system with four-step is available for "general purpose type."

Heat protector prevents burn injury.

Heat protector is provided at front frame where cooker tends to touch during cooking. It prevents burn injury. It is removable and easy to clean.

Easy selection of heater. (Dual purpose type)

One switch easily selects either two heaters at front and back or only front heater according to cooking ingredient. You can reduce waste.

Easy handling of ON/OFF selection for each heater. (General purpose type)

Selection switch makes ON/OFF easy for each heater. Turning only the heater to use ON and the other heaters OFF according to cooking ingredient contributes to energy saving and cost reduction.

Industry-leading lightweight design!

Our griller does not need large and heavy transformer. We realized industry-leading lightweight design which is about half to one third weight compared to other companies' electric grillers. You can make use of limited kitchen space.

• "Water supply connection" is unnecessary.

Reflective plate provided at the heater enhances energy efficiency. Moreover it does not need to keep water in drip tray which is necessary for conventional electric heater griller. You can save cost of water supply facility.

High efficient carbon lamp heater cuts large part of running cost!

• Huge cut in running cost!

Carbon lamp heater heats only upper part of pipe, which cuts waste of energy consumption and large part of running cost. As a result, you can cut 25 to 43 % of running cost compared to gas griller.

Clean & cool, comfortable kitchen environment.

You can keep kitchen environment clean without exhaust gas. It prevents temperature increase in kitchen, which leads to reduction of air-conditioning cost and realizes comfortable working environment.

Approximately half of power consumption compared to other companies' grillers.

Our griller that adopts highly efficient carbon lamp heater can reduce power consumption by about half compared to other companies' grillers. As a result, it needs only small amount of necessary hand switch capacity. So you can use our griller at premises such as tenanted building where power capacity is limited.

Top Heat Griller "Speed Griller" < Infrared burner>

Top Heat grills quickly, evenly, and deliciously.

Our products grill not only from above but also from below the cooking ingredient through Maruzen's unique wavy infrared ray reflective plate. It reduces cooking time by 25% compared to conventional top heat griller (compared with our

existing products.) Moreover the heated wavy infrared ray reflective plate emits far-infrared rays and grills quickly, which makes cooking ingredient maintain appropriate moisture and grilled deliciously. At the same time, it heats air at bottom of grill net which grills ingredient cooking beautifully without being exposed to cool air.

Height-adjustable according to delicate adjustment of the heat.

Condition of fire is adjustable by changing the height of gill net. For "Depth 300mm type", the height of grill net is adjustable in 4 steps. For "Depth 420mm type", the height of grill net is adjustable steplessly by using handle lever.

300mm type", the condition of fire can be adjusted by changing the height of place putting grill net.

420mm "Depth type", the condition of fire can be adjusted by changing the height of grill net with handle lever (stepless).

Easy-to-use automatic firing / front layout.

Automatic firing mechanism is provided for each burner. This energy saving style does not require to fire unnecessary burner. Knobs are arranged on the front, which makes

operation easy.

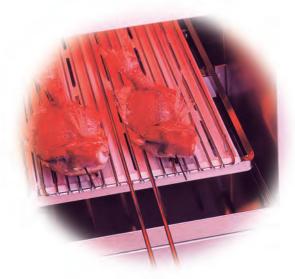

More safe by equipping pilot safety shut off

Pilot safety shut off device is equipped with each burner, it is very safe.

> Products with this mark, has passed the type inspection of the Japan Gas Appliances Inspection

Association. (LP gas, 13A)

Top and Bottom Heat Griller "Speed Griller" < Infrared burner>

Top and Bottom Heat reduces cooking time. You do not need to turn ingredients over.

Infrared burners provided above and below cooking ingredient emit a lot of far-infrared rays whose char-grilled effect is high. You can grill deliciously soft inside. Moreover there is no need to turn ingredients over thanks to the top and bottom heat system. You can maintain beautiful shape of ingredient and reduce cooking time by 20 to 40% compared to other grilling methods (compared with our existing products). You do not need to keep your customer waiting.

Heat-proof plate prevents heat and keeps kitchen comfortable.

Movable heat-proof plate on the front of griller prevents emission of infrared rays and heat to the outside. It prevents temperature increase at surroundings and enhances working environment in kitchen.

Height-adjustable according to delicate adjustment of fire.

You can adjust the fire through changing freely distance of top and bottom burners, and height of grill net and grate according to cooking ingredient's size, amount, and shape. All models are easy to use and steplessly adjustable.

Gas Top and Bottom Heat Griller "Speed Griller" < Infrared burner>

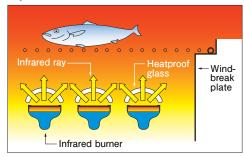

■MGKW-084

Gas Grill deliciously with much more far-infrared rays.

Bottom Heat Griller "Sumiyaki" Infrared burner type.

Outstanding far-infrared effect! Bottom heat/ infrared burner type.

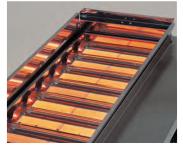

Maruzen's unique infrared burners are covered by a dome shaped special heat-proof glass, which emit a lot of far-infrared rays to grill. Especially, a lot of far-infrared rays enhance char-grill effect. So you can save fuel cost by 20% (average percent compared with our existing products) in the same cooking time with the same deliciousness after grilled. Moreover dome shape helps drip to drop on drip tray, which substantially reduces smoke.

Windbreak plate enhances efficiency. You can grill even on the corner of grill net. (General purpose type)

Windbreak plate prevents infrared rays from escaping to the outside and cool air from entering between grill net and

burner. You can make use of infrared rays without waste and reduce cooking time. Moreover you can grill ingredients deliciously on any place of grill net even when the net is full of inaredients. because windbreak plate prevents cool air.

Gas Bottom Heat Griller "Sumiyaki" Infrared burner type

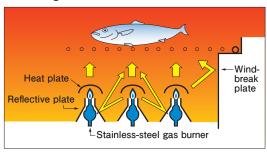

Enhance deliciousness and cut cost! Griller's standard.

Bottom Heat Griller "Sumiyaki" Heat plate type <Stainless-steel gas burner>

Bottom Heat / Heat plate type, ultimate basic of griller.

Heat plate was made of special stainless-steel. The heat plate emits far-infrared rays efficiently and grills deliciously like char-grill thanks to the whole heat plate getting red heated. The dome shaped heat plate sheds drip, which prevents being stained and smoke.

Windbreak plate enhances efficiency. You can grill **even on the corner of grill net.** (General purpose type)

Windbreak plate prevents infrared rays from escaping to the outside and cool air from entering between grill net and burner. You can make use of infrared rays without waste and reduce cooking time. Moreover you can grill ingredients deliciously on any place of grill net even when the net is full of ingredients, because windbreak plate prevents cool air.

■Grill ability / Spit-roasting type

	Size (Weight) mm (g)	Time required
Yakitori	110×20 (30)	9 minutes
Negima	110×30 (35)	9 minutes
Eel (spit-roasted)	120×105 (100)	8 minutes

Grill ability / Dual purpose type

	Size (Weight) mm (g)	Time required
Yakitori	110×20 (30)	9 minutes
Negima	110×30 (35)	9 minutes
Pacific saury	315×40 (135)	7 minutes
Salmon (fillet)	150×40 (70)	5 minutes
Eel (spit-roasted)	120×105 (100)	8 minutes
Yellowtail (fillet)	120×90 (60)	5 minutes

Height-adjustable according to delicate adjustment of the fire. (General purpose type)

You can adjust the fire through changing height of grill net and grate according to cooking ingredient's size, amount, and shape.

Easy-to-use automatic firing/front layout.

Automatic firing mechanism is provided for each burner. This energy saving style does not require to fire unnecessary burner. Knobs are arranged on the front, which makes operation easy.

One touch selection of front and back burners. (Dual purpose type)

■Grill ability / General purpose type

	Size (Weight) mm (g)	Height mm (distance to burner)	Time required
Porgy	250×90 (260)	110~140	11~13 minutes
Trout	200×50 (120)	110	7 minutes
Ayu	200×40 (80)	110	7 minutes
Horse mackerel	250×55 (140)	125	8 minutes
Pacific saury	300×45 (135)	110	7 minutes
Salmon (fillet)	170×50 (70)	80	5 minutes
Yellowtail (fillet)	110×90 (60)	95	5 minutes

%In the case of frozen food, defrost before cooking.

*The required time differs according to cooking ingredient's size, shape, and quality.

Bottom Heat Griller "Honkaku Sumiyaki" Fire burner attached PATENTED

Far-infrared rays UP! Efficiency UP! Deliciousness UP!

Refractory ceramic is used for charcoal cistern wall and ceramic coating bars are used for bottom aspect (charcoal receiving bars). It reduces waste of heat and the amount of charcoal. It emits far-infrared rays efficiently when heated, so you can grill high efficiently combined with far-infrared rays from real charcoal fire. Charcoal fire grills super deliciously. (%Charcoal cistern wall and charcoal receiving bars are easily exchangeable.)

Height-adjustable structure easily changes distance from fire. (Dual purpose type / wide type)

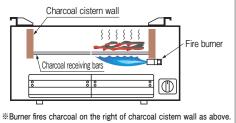

Height of grill net is adjustable to four levels by 25mm until 100mm according to cooking ingredient's amount and height. You can select the best heating. Easy operation with latch.

Easy firing of charcoal with automatic firing!

A durable "fire burner" is mounted for burdensome charcoal firing. You can easily begin authentic char-grill.

Prevent burn injury when touching griller.

Heat protector is provided on the upper side of griller. It prevents burn injury by touching griller during cooking. Heat protector is removable, so you can clean it easily.

Strong SUS304 adopted.

SUS304 of 3mm board thickness is used for griller. It has the quality to last long, because it is corrosion-inhibiting and less heat deformation.

More convenient with optional equipment.

Auxiliary cooking table speeds up cooking.

Removable cooking table is optional. It provides convenient space to put seasoning, sauce, and cooking ingredient for next step. Easy-to clean removable table.

[※]It uses charcoal fire but needs gas to fire burner. ■In the case of frozen food, defrost before cooking.

Delivery time of spit-roasting type and dual purpose type is about 10 days after receipt of order. Delivery time of wide type is about 2 weeks after receipt of order.

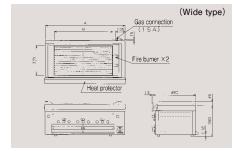

Wide type

■MCK-125

Electric Salamander Change in burnt color changes dishes, makes more delicious!

You can quickly make deliciously brown color on grill menus such as gratin, pizza, hamburg steak, and roast fish. You can adjust delicate burnt color according to menu by adjusting distance between heater and cooking ingredient.

Electric Salamander <silica glass tube heater>

- Stepless height-adjustable heater at the head of griller. You can freely adjust the heat.
- Output power of heater is adjustable to three levels.
- Design that gives a soft impression taking advantage of roundness.

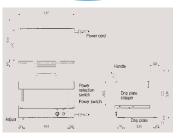

Image of temperature distribution

Heat from the center of ingredient evenly which beautifully evenly browns its surface.

34% energy-saving compared to sheath heater!

Safety Precautions

- Please receive "instruction manual" when purchasing equipments, and read carefully the "instruction manual" before using it. Please do not use for a purpose not described in "instruction manual" and for prohibited matter. Further, please do not use for purpose other than the intended use. Otherwise misuse will cause accidents such as carbon monoxide poisoning, fire and burn and will be cause of breakdown.

 Please do not use gaseous species and a power source (phase, voltage, frequency) not displayed in the main body. Otherwise, it will cause accident and will be cause of breakdown.

 Please do not disassemble or modify the equipment by all means. Otherwise, it will cause the accident or breakdown.

Precaution for Installation

- Precaution for Installation

 Equipment installing/moving work and ancillary facility works for such as gas, electricity, steam and water should be in accordance with Fire Service Act, Fire prevention ordinance and "Standards and Practical Guidelines for installing gas equipment". And please thoroughly read the manual instruction or working instruction and ask your dealer that you purchased or a specialized facility management company to properly install your product onto a safety place.

 In a place where a thermal equipment and an exhaust duct with an exhaust hood are installed, please use non-combustible materials such as concrete, brick and mortal for finishing and grounding (inside part of finishing) of equipment body's surrounding area and the upper surrounding area (backward, lateral, upper, floor face and ceiling)

 Where the finishing and grounding of the equipment body's surrounding area and the upper surrounding area made by other material than non-combustible material when installing a thermal equipment and the exhaust duct with an exhaust hood, please install the equipment with offset distance specified for each equipment. Otherwise, it will cause a fire. Please carefully read "instruction manual" and "working instruction" for non-combustible material and installation standards.

 Be sure to install a heat-resistant/non-combustible exhaust duct with an exhaust hood upon the thermal equipment. As to equipments for generating oil smoke and steam, please install an exhaust duct with an exhaust hood which includes grease removing device. An exhaust fan of an exhaust duct should be operated while an air supply opening is absolutely necessary to be provided at an equipment-installed place.

 Please be sure so as not to extend an exhaust stack of the equipment using gas. Otherwise, it will lead to insufficient performance of equipment, accidents such as carbon monoxide poisoning, fire and burn, or breakdown.

 As to power source of equipment using electricity, please use a correctly-wired dedicated plug or a br

- The visual appearance and specification of products listed on this catalog may partly be altered due to quality improvement without notice.

CAUTION

- Please carry out adequate ventilation, i.e. by turning an exhaust fan when using the thermal It must be noted that insufficient ventilation will cause accident such as carbon monoxide
- poisoning due to incomplete combustion.

 Please do not leave the device when using because it is dangerous.

 Be sure to extinguish fire, close the gas main and turn off the power switch when you leave out from the equipment and do not use the equipment. Otherwise, it can cause a fire due to abnormal overheating.

 There is a possibility of causing fire if oil debris and dirt are accumulated too much at the equipment body's surrounding area, a gravy tray/waste oil receiver and a water tray. Please two it is the contribution of the contribution is the contribution of the contributio
- keep it clean.

 Please do not touch any part other than an operation unit because the equipment body and
- Priesse do not rouch any part other than an operation unit because the equipment body and the surrounding part become hot during in use and soon after that. And please keep away your hand and face from the exhaust port. Or you may get burned.

 Do not apply water to equipment body and do not wash the whole part with water. Otherwise, it will cause the malfunction of equipment.

 If an emergency happens such as an earthquake, fire and gas leakage, please stop the usage of equipment and turn off the gas main.

- usage of equipment and turn off the gas main.

 Please do not put any combustibles or flammables such as a spray, gasoline, benzene, etc upon the equipment and the surrounding area. It may cause fire.

 Please sufficiently consult with a specialized physician when a medical electronic device user such as a pacemaker will use an electromagnetic equipment.

 Products listed herein are for commercial purpose. For domestic use, be sure to consult with a dealer that you purchased or a specialized facility management company and properly install the equipment in accordance with prescribed installation standards.

Costs for delivery, installation and withdrawal of old model are not included in this price.
