Popular Ramen can be easily-and-deliciously cooked by latest noodle boiler which is praised even in the specialized shop.

4 and 6 hand basket type model is Cool kitchen specification.

- A double heat insulating structure can be achieved by covering the inside of main body with a heat insulator and further by providing a heat insulating layer in the surrounding area. The double heat insulating structure let the optimized air flow inside the equipment to take heat from the main body which suppresses the radiation heat from the equipment and decrease the surface temperature.
- The front surface of main body is provided with an intake port and exhaust port for making air flow which can suppress the temperature rise of the front surface and enhance the safety.
- An exhaust stack is a chimney structure which prevents exhaust gas from spreading. The exhaust gas can quickly be led to a hood while improving environment in the kitchen.

Large-sized boiling tank for making noodle delicious with chewy texture.

Comfortably and strong chewy texture of noodle can be performed by boiling noodle with rich hot water at the high speed. Maruzen automatic noodle boiler adopts a large boiling tank. Whenever and everyone can boil delicious noodles which professionals praise.

Maruzen original hole heat pipe.

Maruzen special circulation heating method is adopted, realizing the heat efficiency of 60% and it is economical with no waste of energy while performing the excellent boiling ability.

Hot water supply device has energy-saving design by utilizing exhaust heat.

Scum and slime can be removed by overflow without lowering the temperature inside the boiling tank, so continuous cooking can be performed.

Steam shutters to enhance heat efficiency and safety.

Automatically closed when the boiling basket is not in use to prevent boiling water from splashing. Since heat is not given out, heat efficiency is enhanced and boiling time becomes shorter with energy-saving.

Products with this mark, has passed the type inspection of the Japan Gas Appliances Inspection Association. (LP gas, 13A)
**Cool Kitchen series Automatic Noodle Boiler**

Lift-down automatically when you push the Lift Cap of basket!

“Cool Kitchen series Automatic Noodle Boiler” which lifts up after boiled.

- Lift-down automatically when you push the Lift Cap. Buzzer & Lift-up automatically when the set time comes. You do not need to check the status of boiled noodle. Everybody can boil delicious noodles. It is useful at peak times as well as laborsaving. Timer is touch-panel method which is easy to be used. The time can be set in 1 second increments. When you push the Lift Cap during cooking, the boiling stops and lift goes up automatically. Baskets can be lifted up and down by Touch-panel too.
