High grade noodle boiler series

Powerful boiling with wavy tank heating method! Highly heat efficiency / Energy saving with hot water supply device utilizing exhaust heat and steam shutter.

Wavy tank bottom to realize strong boiling ability and excellent cleanness.
Since heat of burner can be transmitted without waste thanks to wavy shape of tank bottom, delicious noodle can be boiled with strong boiling power. Because of R-processing at the corner in the tank and wavy tank bottom, scum and slime can easily be removed.

Energy saving by hot water supply device utilizing exhaust heat with highly heat efficiency.
A hot water supply device utilizing exhaust heat includes a heat exchanger and can supply hot water with 600cc/minute anytime. Further, since scum and slime can be overflowed widely from front side without reducing temperature in the boiling tank, the hot water can effectively be prevented from getting cloudy.

Energy-saving and usability with half-opening position.
Gas cock with half-opening position is adopted to enable switching between high heat and low heat. Energy-saving and usability can be realized with half-opening position during idle time and full-opening position during busy time.

Steam shutters to enhance heat efficiency and safety.
Automatically closed when the boiling basket is not in use to prevent boiling water from splashing. Since heat is not given out, heat efficiency is enhanced even by highly advanced hot water supply device utilizing exhaust heat and boiling time becomes shorter with energy-saving.

Lift-down automatically when you push the Lift Cap of basket! “High Grade Automatic Noodle Boiler” which lifts up after boiled!
Lift-down automatically when you push the Lift Cap. Buzzer & Lift-up automatically when the set time comes. You do not need to check the status of boiled noodle. Everybody can boil delicious noodles. It is useful at peak times as well as laborsaving. Timer is touch-panel method which is easy to be used. The time can be set in 1 second increments. When you push the Lift Cap during cooking, the boiling stops and lift goes up automatically. Baskets can be lifted up and down by Touch-panel too.

Standard-equipped water supply device.
High grade automatic noodle boiler  Tasty!! Thus automatic lift up type.

MRH-L06
List Price: ¥1,130,000 (tax-excluded)

Attached lift up mechanism
Increased Heat Efficiency 20%
High spec hot water supply device + Steam shutter attached

Model Change

High grade noodle boiler  High spec, Reasonable and usable model.

MRH-06
List Price: ¥598,000 (tax-excluded)

Increased Heat Efficiency 20%
High spec hot water supply device + Steam shutter attached
