

Gas Convection Oven

Compact and Easy Operation

- Circulating Hot Air
- Shorten Cooking
- Keep Juicy Taste
- Safety Device System
- Reinforcement Glass
- Micro Control

MCO-5T

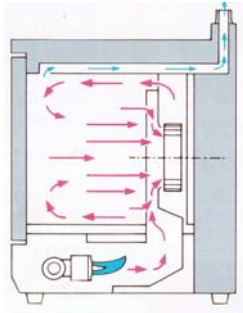

MCO-7TD

Anyone can cook delicious and speedy

Circulating Hot Air

Fan inside the oven circulates hot air and heats swiftly.
Shorten cooking time and keep delicious taste and nutrition.

Hot air flows from right to left or up and down.
This circulating heats the entire food evenly.

Compact Body

Useful compact body for setting easily - Width 470 mm

Operation is done well due to open door from the under
and not to interruption for the equipment on the left and right side.

Control Touch Panel

Control 30 sec. to 99 min. for cooking timer.
A buzzer sounds when cooking is finished.
A time can be extended during cooking.

Safety Device

Safety device is activated when burner is extinguished.
Overheat protection device is activated when the temperature over
The alarm is informed in both situations.

Accurate Control by Micro Computer

100°C~300°C by 1°C can be controlled.
