

Auto Meat Dumpling Cooker

Automated Water Feeding, Steaming, And Frying!

- Micro Computer Control
- Use of Thermistor Sensor
- Flow Rate Sensor
- End Buzzer
- Space Saving
- Support for Custom Dumplings

MAZ-4S

MAZE-44

Maruzen

Made in Japan

Full Automation by Micro Computer

Just press the start button to fry, feed water, steam, and fry meat dumplings. Anyone can fry meat dumplings like a professional cook.

Maintaining Pan Temperature Accurately

A thermistor sensor is used to maintain the temperature of the whole pan accurately. Meat dumplings can be fried evenly and the finish always looks beautiful.

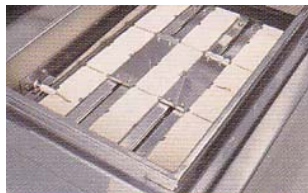

Auto Water Feed by Flow Rate Sensor

A set amount of water is fed automatically to steam meat dumplings evenly.

Gas Auto Meat Dumpling Cooker

Quick Cooking by Infrared Burner

The infrared burner prevents unevenness in temperature on the pan surface and fries meat dumplings beautifully. The cooker heats quickly so it is helpful during busy hours. An energy saving construction saves gas consumption.

End Buzzer Saves Labor

A buzzer sounds when frying is finished, thus contributing to labor saving.

Compact Table Top Type

This table top type is designed compactly.

Frying Custom Dumplings Well

The frying time and amount of feed water can be set arbitrarily to support custom dumplings.

Continuous Spark Auto-ignition

The cooker is automatically ignited by a continuous spark method, and is equipped with a flame failure safety device.

Model		External Dimensions (mm)				Pan Dimensions (mm)				Pan Qty	Gas Consumption		Water Feed Port	Rated Power Supply (50/60 Hz)	Power Consumption (50/60 Hz)	Weight (kg)

Electric Auto Meat Dumpling Cooker

Specially Designed Heater

Maruzen's specially designed heater is used to heat the entire bottom of the pan evenly, thus prevent frying unevenness and fry dumplings beautifully and well.
