1. Micro computer allows a unit to automatically control feed water, steaming and frying.
2. Thermister sensor offers to maintain accurate temperature on pan overall.
The sensor works in order to fry evenly.
3. Automatic flow control allows to feed water at a certain water quantity.
It enables meat dumpling to steam evenly.
4. Frying time, feed water quantity, steam time, face frying time can be programmable free.
5. Buzzer sounds when cooking is automatically finished, helping laborsaving.
6. Table top and space-saving
