

Auto lift type is also available!

● Lift up without missing a delicious fried time. A buzzer notifies the fry ending time.

Fry basket lifts up automatically with the prescribed cooking time. Even a part-time worker can cook easily, and it is especially effective for energy saving. Cooking time (Between 0 sec to 99 min 59 sec) and oil temperature (Between 30 to 220°C) in 10 menus can be registered. The buzzer informs us the upcoming cooking time, without missing the most delicious fried time. In addition, when fried food is not enough for the cooking time, additional cooking can be done with one-touch by 10 seconds.

● You can realize the good taste with the setting for twice-frying.

One touch cooking can be performed if setting standby time to the second frying time after the end of first cooking time and the second fry-cooking time. You can realize your favorite taste.

● Manual operation can be performed.

It is also possible to cook by setting the temperature and time manually. Please use it by pressing the manual button if menu registration is no need or if you want to change the temperature and cooking time per each cooking.
